

McMaster and Westlake Named Research Prize Winners

Donald Westlake (Microbiology) and Juliet McMaster (English) have been named this year's winners of the University of Alberta Research Prize. The awards ceremony will take place on Wednesday, 26 March, in SUB Theatre.

Juliet McMaster, recently

elevated to the status of "University Professor" (see *Folio*, 16 January), has made significant contributions in her study of Victorian literature. Her book on *Trollope's Palliser Novels*, for example, has been hailed as the best work on the subject and one which has changed the way

people think about that author. Dr. McMaster, a former McCalla Professor, graduated with an MA and PhD from this University. Her doctoral thesis on irony in Thackeray's novels paved the way for her first synoptic book: *Thackeray: The Major Novels*

(Toronto: University of Toronto Press, 1971). McMaster's latest book, *Dickens the Designer*, will be published this year by Macmillan.

Donald Westlake has been Professor and Chairman of Microbiology since 1969. During this period, he has carved out for himself an enviable reputation as one of Canada's top petroleum biochemists. His work on microorganisms and the petroleum industry and in the areas of environmental and industrial microbiology has been recognized internationally. He has been an invited speaker in Israel, Yugoslavia, and the United States. Westlake's almost 90 formative contributions demonstrate his breadth of scholarship. Recently, outstanding work with Susan Jensen and collaborators at other institutions (S. Wolfe and Arnold Demain) has led to patents awarded and other patents applied for in the field of biosynthesis of unnatural cephalosporins.

The research prizes will be awarded during the evening of 26 March. Each recipient will deliver a lecture (titles to be announced); a public reception will follow. □

Award-Winning Poster Helps Prevent Book Damage in Library

Our libraries have been losing up to \$10,000 worth of books a year because of the uncivilized behavior of some readers. These library users not only read books, they tear out a page or two of text and remove artwork; they break the book's back so that covers fall off and are lost, or the pages fall out; they deface pages by writing in the margins, and compound that sin by using highlighter all over the text—a practice which, in a librarian's eyes, makes the book as unreadable as if pages had been removed.

This is active mutilation.

But a smaller number of readers are also guilty of passive mutilation. They eat while they read and let crumbs fall on the pages. The smell of food attracts lice and silverfish to the book and these vermin bore through pages to get at the crumbs. The aroma of decomposing food attracts paper lice, too, who ignore the crumbs but eat the pages.

A little while ago, Brian Champion, librarian in Rutherford North, felt it was high time to make library users dramatically aware of these problems. "We wanted to point out that library books are not *your* books. When you use a library book, you don't have the same ownership over it as if you owned it," he says, "and we wanted to have something eye-catching and visually arresting to get this over."

So he walked across the quad and asked the Office of Public Affairs

for help in designing a poster and a bookmark.

His own thoughts had been tending towards pictures of famous people with their heads cut off, to emphasize that mutilating pages is as horrible as mutilating people. But OPA graphics designer Bonnie Koenig, finding that concept a little violent, worked her design around the words MUTILATION and VERMIN, manipulating them graphically to illustrate their meaning. Mr. Champion and his colleagues gave her some text suggestions . . . and the dramatic result is pictured here. *Mutilation* is on a bright red background, *Vermin* on bright blue. For bookmarks, both posters are simply reduced appropriately.

Mr. Champion felt these striking designs would be so effective that he had Printing Services produce 250 posters and 750 bookmarks of each, and distributed copies to his library colleagues across campus.

He went on to send copies of the bookmarks to a number of professional library publications, announcing that the posters and bookmarks were for sale and asking that this information appear in the publication.

The response has been amazing, he says happily.

The bookmarks (\$5 for 100) are virtually sold out, and the posters (\$5 each) have been sold in five provinces and 14 states. Purchasers

include the Metropolitan Toronto Library Board; the American Library Association in Chicago; Boise State University, Idaho; the public library, Inglewood, California; a school in Vancouver; the City of Phoenix; and Bellevue Hospital Centre, New York.

But the success story doesn't stop there.

The posters and bookmarks earned a Certificate of Recognition last August at the Pacific North

West Library Association's annual conference, held under the theme "Models of Excellence".

And the posters are working effectively, too.

"We have found since the posters first began appearing on campus last September that there are now fewer incidents where staff have to intercept food coming into the libraries," Mr. Champion reports. "And we are finding less damage in the books returned, as well." □

Cross-Cultural Studies of Dreams the Objective of Boreal Institute Workshop

Under the auspices of the Boreal Institute for Northern Studies, social scientists and representatives from native groups will discuss plans for cross-cultural research on dreams at a workshop scheduled for 31 January to 2 February.

Don Kuiken (Department of Psychology), Leendert Mos (Centre for Advanced Study in Theoretical Psychology), and David Foulkes (Emory University) have proposed the investigation of dreams of native people in Canada using recently developed procedures for representatively sampling dreams. These procedures, validated in laboratory studies of dreaming, require awakening an individual during a period of sleep likely to be accompanied by dreaming. Immediately after awakening, the individual is systematically interviewed about any dream that occurred. These procedures contrast with procedures previously used in cross-cultural studies of dreams in which dreams spontaneously recalled in the morning have been analyzed.

The new procedures will enable more precise cross-cultural study of dream formation, and may indicate whether people in various cultures draw on different experiences to form their dreams. Perhaps people with contrasting evaluations and understandings of dreams incorporate different memories and knowledge into their dreams. The feasibility of studying these possibilities by collecting dreams from Canadian native people is the subject of the workshop, and specific strategies for initiating the research will be the goal of their discussions.

The Boreal Institute for Northern Studies is coordinating the workshop during which the research team will meet with cross-cultural psychologists John Berry (Queen's University) and Robert LeVine (Harvard University); anthropologists David Young and Milton Freeman (University of Alberta) and Joseph Couture (Athabasca University); and Mel Beaver (School of Native Studies, University of Alberta).

The workshop is made possible by a grant from the Central Research Fund of the University of Alberta. □

Books Donated by Japan Foundation

The Consul General of Japan, Mamoru Funakoshi, presented the Japan Foundation's eighth gift of books to the Department of East Asian Languages and Literature in a ceremony in University House last week. The 103 volumes are valued at \$2,470, which will be matched under the provincial government's matching grant program. Half the donation is of books on Japanese literature (both classical and modern) and intellectual history. The other half consists of teaching support materials and is made up of reference books, textbooks on the Japanese language, and quite a number of dictionaries.

A non-profit organization, the Japan Foundation's purpose is to promote international cultural exchange and mutual understanding between Japan and the rest of the world.

Also present were the Consul of Japan, K. Tajika; Des Berghofer, Assistant Deputy Minister, Program Services Division, Alberta Advanced Education; Morris Maduro, Director Asia/Pacific Rim Section, International Division, Federal and Intergovernmental Affairs; Brian Evans, Associate Vice-President, International Affairs; Terry White, Dean of A. who accepted the donation on behalf of the University; and Stan Munro, Chairman of the department whose library is enriched by the gift. □

Pang Guiding Department of Physiology

The Department of Physiology has a new Chairman—Peter Pang.

Dr. Pang, who began the chairmanship on 1 January, was born in Hong Kong and obtained

his undergraduate science degree from the University of Hong Kong. He subsequently undertook graduate work at Yale where he obtained his PhD in the Biology Department in 1970. After post-doctoral work in the Department of Pharmacology at the College of Physicians and Surgeons of Columbia University in New York, he joined the staff of that department. In 1976, he was appointed Associate Professor in the Department of Pharmacology and Therapeutics of Texas Tech University Health Sciences Center and became a full Professor in 1981.

Dr. Pang has impressive research credentials in the area of endocrine physiology with approximately 120 published papers and reviews, previous research support from the National Institutes of Health, and a generous establishment grant from the Alberta Heritage Foundation for Medical Research to develop his new laboratory in the Physiology Department. His research interests have been in comparative endocrinology in lower vertebrates and more recently, in the pharmacology and physiology of parathyroid hormone and its analogues with emphasis on the response of vascular smooth muscle. The pharmacology of hypotensive peptides is under active investigation, including studies of Chinese herbal medicines with blood pressure lowering properties.

Dr. Pang has developed extensive international collaborations (Japan, Chile, England, France), and most recently, a scientific exchange agreement with Jinan College of Medicine, Canton, People's Republic of China. □

Two Nights at the Opera

Gian Carlo Menotti's "The Consul" will be performed on the Convocation Hall stage on 7 and 8 February at 8 p.m. The three-act opera, considered by many to be Menotti's finest work, is being produced by the University's Opera Workshop.

"The Consul" will be performed in English, with full orchestra conducted by Alfred Strombergs. Alan Ord will direct the production.

The opera is based on one family's attempts to leave a hostile country, attempts which precipitate intense struggles against bureaucracy.

Tickets are available at the door, or in advance from the Department of Music, 3-82 Fine Arts Building (\$3.50, students and seniors; \$6, adults). □

New Director Revamping Housing and Food Services

After chatting up David Bruch, one is tempted to apply a bold underline to the lead word in those "Live in Lister" posters displayed around campus.

The new (appointed 1 January) Director of Housing and Food Services has taken the "we're-the-landlord, students-are-the captive-audience" notion and flung it from the top of MacKenzie Hall. He's met and will continue to meet with various student organizations and the Dean of Students in an effort to make the residences more than convenient places to eat and sleep. He's installed more diversions (pool table, dart board, mini-mart, etc.) in the Lister Hall complex and has plans to add more amenities in other residences. He's declared 1986 the Year of Customer Service. He's helped develop sound promotional material that's included in information packages sent by the Registrar's Office to those high school students interested in attending the University. He's even, steady now, set his sights on showing a modest profit at the end of the next fiscal year (if that comes to be, and he has his druthers, the money will be transferred into the department's general reserve and used for various activities).

The initiatives are, well, being eaten up by customers, of which there are 17,000 a day five days a week. Time was that Housing and Food Services used to get an average of five written complaints a day and enough phone calls to put a Jerry Lewis telethon to shame. Now it's a rave new world, one in which the Director gets Christmas cards from students.

Something else that warms his heart is data that show that

David Bruch, formerly Technical Recruitment Officer in Personnel Services and Staff Relations, has found the change in careers to his liking.

students who live in residence record a slightly higher grade point average than those who reside off campus. A good selling point. Housing and Food Services will be after more because the department has competition, both on campus and in nearby neighborhoods. Each operation is looked at separately. For example, CAB cafeteria and the vending operation (Housing and Food Services manages more than 200 vending machines) are, traditionally, "shining stars". Okay,

but concession sales at Bears and Pandas events have been lagging. Bruch talked it out with Physical Education and Recreation personnel and both parties are confident that there will be a turnaround. Accounting management has really not been the streamlined operation that it should be and so computerization is being effected.

Having been on campus since 1978 and having served as Acting Director of Housing and Food Services since 15 June last year, Bruch realizes that going to university is not a walk in the park. A Housing and Food Services Director is not a social director but his operation can contribute to easing the tension that accumulates after hours in the classroom. "We still charge students and maintain discipline," (a word he uses with hesitation) "but we want the residences to be seen not as apartments but as residences that enhance the academic, personal and social lives of students," he says. Certainly students have more respect for the residences—common area damage is down 85 percent from last year.

The director oversees six residence complexes, 18 food operations, and a staff of 330,

including 235 FTEs. Housing and Food Services' annual operating budget is slightly less than \$14 million; the annual capital budget is \$1 million. In terms of square footage, Housing and Food manages 22.7 percent of the University's property. The University currently provides a variety of student housing for 15 percent of the student population (there are 3,200 students living in residence, not including children and spouses).

Bruch recently toured the housing and food setup at the University of Manitoba and he's scheduled to visit those at the Universities of Calgary and British Columbia and Simon Fraser University. He may also go to Carleton and the University of Toronto. He will receive his counterpart from the University of Regina, and the University of Victoria has "questioned us about the new things we're trying."

Housing and Food Services will try to do one customer survey per term in the larger operations.

While Bruch is pleased the universe is unfolding as it should, he isn't about to take any bows. Subway's financial position has to be improved, reduced summer rate details have to be worked out, and there are "major challenges" in the areas of occupancy and in improving the residences' credibility in the community.

He didn't say as much, but a sentence from the comprehensive "Housing Handbook" reflects Bruch's approach. Addressing those students new to residence life, the document says . . . "You may, however, have occasion to see the Director of Housing and Food Services or the Housing Officer, both of whom will help you in any way possible." □

Correction

In our story last week about the tape on Raoul Wallenberg, *Folio* received out-of-date information on the cost of obtaining dubbed tapes from the Instruction Technology Centre.

Current ITC policy is that the tape is available free of charge to any Faculty of our University, on receipt of a blank videocassette. Anyone else in North America can obtain a copy by sending \$30 and a blank videocassette. Outside North America return postage must be included with \$30 and a blank videocassette. □

Kebarle, Vederas Recipients of Significant Awards in Chemistry

The Chemical Institute of Canada Medal was recently awarded to Paul Kebarle, Chemistry, for his "outstanding contribution to the science of chemistry or chemical engineering." Dr. Kebarle received the award, a medal of rare palladium, for his work in the discovery and development of a method for determining energy changes of ionic reactions in the gas phase, involving the measurement of ion equilibria with a mass spectrometer.

The Merck, Sharp and Dohme

Award given annually by the Chemical Institute of Canada has been won by John Vederas, Chemistry. It is awarded to an organic chemist or biochemist under the age of 40. Dr. Vederas won the award for his work in the biosynthesis of secondary metabolites (compounds produced by specific groups of organisms). His work involves nuclear magnetic resonance methods, using stable isotopes, to study how compounds are made in nature. □

Unclassified Student Enrolment on the Rise

Since its introduction in 1982, unclassified student enrolment has continually increased. Current enrolment stands at 582, a 73 percent increase over last year's total of 335. The classification is designed to provide more effective access to the University for adults who want to take a few selected credit courses but who do not wish

to commit themselves to a degree program. All courses offered are regular University courses but do not require particular background knowledge in the subject. A record is kept and should the student decide to apply for a degree program the credits earned are evaluated for appropriateness to that program. □

Talks

Boreal Institute

30 January, 2 p.m. John W. Berry, Department of Psychology, Queen's University, "Culture and Cognition Among Nomadic Peoples." 1-09 Business Building.
3 February, 10 a.m. Robert A. Levine, Laboratory of Human Development, Harvard University, "The Early Experience Hypothesis: Cross-Cultural Versus Individual Differences Research Strategies." CW-410 Biological Sciences Building.

Literary Theory Series

30 January, 4 p.m. R. Burch, "Philosophy and the Colonization of Literature." 5-20 Humanities Centre. Further enquiries should be directed to the Series Coordinator, M. Verdicchio, Arts 348B, 432-2003.

Family Studies Chairmanship

The Selection Committee for Chairman for the Department of Family Studies has been established. Applications must be received by 31 January 1986. Address enquiries and applications to: D.R. Badir, Dean, Faculty of Home Economics, University of Alberta, Edmonton, Alberta T6G 2M8.

University Toastmasters

University Toastmasters will meet over supper on 5 February (6 to 8:30 p.m.) at the Faculty Club. On succeeding Wednesdays, Toastmasters will meet from noon to 1 p.m. in 1-20F Cameron Library. Guests welcome. 432-3308 (Mark).

Extension Course Brochure: Women's Program

The Winter/Spring Brochure for the Women's Program is now available by calling 432-3093.

6 February, 4 p.m. C. Bullock, English, "Toward Feminist Rhetoric." 5-20 Humanities Centre.

Emil Skarin Fund

Invitation to apply

Applications are invited to the Emil Skarin Fund Committee of the University Senate for financial support of a 1986 project or projects. Approximately \$5,000 from the Fund will be available.

Projects must be of value both to the public as well as the University of Alberta; be consistent with the general aims and purposes of this University, but not normally funded by it; and originate within the Province of Alberta.

Preference will be given to projects with an emphasis on the humanities and the arts. Proposals should include objectives, schedule, budget, and procedures for organization and evaluation.

Application forms are available on request, and should be returned, completed, by 3 March 1986.

Positions

The University of Alberta is committed to the principle of equal opportunity in employment and encourages applications from all qualified people.

In accordance with Canadian Immigration requirements, these advertisements are directed to Canadian citizens and permanent residents.

Academic

Assistant Business Librarian

The University of Alberta Library invites applications for the position of Assistant Business Librarian, Humanities and Social Sciences Library. Reporting to the Business and Economics Librarian, the incumbent will provide reference and information services for all subject areas of business administration, and is responsible for the development of the accounting, taxation and M.I.S. collections. Other duties include computer searching, liaison with faculty and bibliographic instruction.

The successful applicant will have a degree in Library Science as well as a degree in Business Administration. Reference or collection development experience would be an asset.

This is a Librarian I position with a salary range of \$24,604 to \$31,268.

Applicants should send *curriculum vitae*, transcripts of academic record and the names of three references to John Teskey, Library Personnel Officer, Cameron Library, University of Alberta, Edmonton, Alberta T6G 2J8, prior to 13 February 1986. The expected date of appointment will be no later than 1 July 1986.

Assistant Professor, Educational Foundations

The Department of Educational Foundations has an opening for a tenure-track appointment at the Assistant Professor level, commencing 1 July 1986. The 1985 annual salary floor is \$30,316. The position is subject to budgetary authorization. Applicants should have proven ability or demonstrated potential for teaching and research. Responsibilities will include instruction and program development in introductory courses in the history and sociology of education in Canada. Preference will be given to candidates with a PhD with teaching experience in the History of Education or the Sociology of Education.

Send applications (including complete *curriculum vitae* and names of three referees) by 31 March 1986 to the Chairman, Academic Appointments Committee, Department of Educational Foundations, 5-109 Education North, University of Alberta, Edmonton, Alberta T6G 2G5.

Research Assistant/Nurse, Department of Pediatrics

The Department of Pediatrics is looking for a full-time research assistant/nurse to participate in several major projects, including vaccine studies among the Inuit, and working with immune deficient patients. Tasks involved would cover such aspects as patient interviews, data coordination, developing research protocols and report writing. This individual would have primary responsibility for the day-to-day activities working independently while participating as part of a research team. It would be helpful if the person had experience in conducting studies as well
